Meet Our Apple Guru

We do not have space for all of the rave reviews we have received about volunteer Yoav Zohar:

I need to thank Penns Village for sending Yoav. I have gone to the Apple store many times for help, but I still had a list of unanswered questions.

I completely understood Yoav, and even better, he understood me, what I needed to do and what I wanted on my iPhone and iPad. He is a delightful person and a very good teacher.

Thanks again for sending Yoav. He helped me so much and he is a super person.

Yoav is a veteran start-up engineer who was sent by an Israeli software company to Michigan 27 years ago to help revolutionize the automotive robotics simulation industry. He bridges the technology gap for a generation that did not grow up with computers but who know their "stuff" from "A to X" and only need some help with the "Y to Z" portion of their digital devices.

Yoav has a passion for order and simplicity and our members get more than they bargained for, often starting out with a minor request and ending with an educated and effective use of the "Apple's ecosystem".
